PROJECTS

Workout Buddies || Team Lead

https://github.com/Tuzosdaniel12/Workout-Buddies | https://workout-buddies.herokuapp.com/

A simple application that allows the user to create workouts of their own that can be shared freely amongst fellow users of the application.

Tools: Js, Css, Bootstrap, Sequelize, Node.js, express, handlebars, Nodemailer, Mailgun, Passport, JWT, Axios

Role: As a team lead used effective communication skill to monitored teams progress and helped when needed. Created the database, account activation, authentication routes, rendering data with the handlebars templates created by the front-end team.

Movie Trailer Match-Up || Team Lead

https://mfrisch87.github.io/MovieTrailerMatchUp/ | https://github.com/mfrisch87/MovieTrailerMatchUp

This application creates a hub of sorts where the user can access a variety of movies associated with their search query and have instant access to the most relevant movie trailer associated with each.

Tools: Js, Css, Bulma, Youtube Api, OMDB Api

Role: As a team lead, I helped the front-end team implement a pleasant design. Helped the back-end team, dynamically display API response. I focused the remainder of my energy upon streamlining the application and tracking down edge cases.
